

**THE  
NATIONAL  
BOARD**

OF BOILER AND  
PRESSURE VESSEL  
INSPECTORS

August 21, 2009

Mr. Paul Heald  
Valvtechnologies, Incorporated  
5904 Bingle Rd  
Houston, TX 77092

**Subject: Renewal of Capacity Certification, Valve Type EOL121NRA \*P1-MK1H (NB Cap. Cert ID No.: VLC-M59082)**

Dear Mr. Heald,

We have reviewed the application for renewal of capacity certification for the subject valve type dated December 3, 2008. Since the flow path is unchanged and no functional testing of power operated valves is required, all requirements for recertification have been met.

In review on drawing EOL121N7BWRA5P1-STD we note that valve body and bolting materials are listed with ASTM specifications. These parts must be procured and documented as meeting ASME Section II material specifications. This includes part numbers 5, 7, 8, 9, 10, 17, and 18 (Ref: Section I, PG-73.2.3).

**Valvtechnologies, Incorporated** is hereby granted capacity certification and authorization to apply the "NB" mark to the valve type listed in the scope of certification. This authorization is valid for the above location and only while the organization holds a current ASME "V" Certificate of Authorization and is fully implementing its quality system as accepted by the National Board.

**SCOPE OF CERTIFICATION**

**VALVE TYPE: EOL121NRA \*P1-Mk1H**

**Organization Type: Manufacturer**

**Certified Rating Value: Slope = 109.2 PPH/PSIA**

**Size: 2-1/2" x 4"**

**Pressure Range: 55 through 5000 psig**

**Certification Expiration Date: December 4, 2012**
